

Benefits:

- Stops 100% of attic draft at 500 pascals of vacuum (very high vacuum)
- Stops stink bug infiltration from attic to house
- Saves energy year round - Proven Reduction of up to 465 cfm's in air leakage
- Is a moisture barrier as well as an air tight energy loss barrier
- Easy zippered access for adults, more difficult for children to get through
- Will not tear or rip if it brushes against sharper ladder edge like cheaper products. It is industrial strength.
- At even \$20 in savings per month it will save over \$6000 in energy cost over the life of your mortgage
- If you upgraded to a higher efficiency HVAC unit, it certainly makes senses to make a small investment to keep more of

Your handmade solution for attic energy leaks!

- During the winter, your heat rises and looks for a way to escape the house; the best escape: Your attic hatchway or your whole house attic fan .
- Your attic leaks approximately 35% of your energy. (See www.epa.gov/greenhomes/attic/htm)
- With Attic Zipper, your saving money on your energy bills throughout the entire year!
- By installing an Attic Zipper, you not only reduce your energy bill, but also contribute to global energy conservation and global health for the planet!

Keep heating/cooling in your home, not your attic!

Attic Zipper seals your attic completely!

Summer Energy savings made Easy!

The photo on top displays an Infrared heat Image of an attic door without Attic Zipper at 97.5°F, showing rapid infiltration of extremely hot air back into the house.

The photo on the bottom, after installing attic zipper, reads 66.3°F, proving that Attic Zipper keeps your attic sealed and temperature protects your house year round!
